D-81679 München (DE)(54) **An improved process for the preparation of water soluble polymer dispersion.**

(57) The present invention is particularly useful in preparing a water soluble polymer dispersion. According to one preferred embodiment of the invention, the dispersion is prepared by polymerizing a water soluble mixture of from about 15 to about 30% percent by weight of a cationic monomer represented by the following general formula (I):

where R_1 is either hydrogen or CH_3 ; R_2 and R_3 are each an alkyl group having 1 to 3 carbon atoms; A_1 is either an oxygen atom or NH ; B_1 is either an alkylene group having 2 to 4 carbon atoms or a hydroxypropylene group, and X_1^- is an anionic counterion, and/or a second cationic monomer represented by the following general formula (II):

where R_4 is either hydrogen or CH_3 ; R_5 and R_6 are each an alkyl group having 1 to 2 carbon atoms; R_7 is a hydrogen atom or an alkyl group having 1 to 2 carbon atoms; A_2 is either an oxygen atom or NH ; B_2 is either an alkylene group having 2 to 4 carbon atoms or a hydroxypropylene group and X_2^- is an anionic counterion; and

EP 0 657 478 A3

EP 0 657 478 A3

(meth)acrylamide in an aqueous solution of from 17 to about 19 percent by weight of a polyvalent anionic salt.
